FIELD POSTAL ARRANGEMENTS.—The proposed on in the time of despatching letters from aid is being discussed with great interest by the ants, and considerable disappointment is now felt that the hour is not much later than that arranged for by the authorities. Proclaimers

igned to be thankful for small mercies in the way of local improvements, and at first even the duration of the time from 6.30 to 7.30 p.m. was not as satisfactory, and the reason assigned for the same not being extended farther, viz., that letters being sent by the last train from Dronfield being too late for the outgoing mails, was accepted as a sufficient reason. Since the first announcement of the same, which appeared in the *Independent* last week, however, the subject has attracted a large amount of attention, and those connected with the

cial interests of the town, to whom a letter would be most servicable, have inquired into the matter, and now assert that there is no justification in the statement that the letters would be too late to mail at Sheffield if forwarded from Dronfield at 10.3 train, as suggested in the memorial. The train arrives in Sheffield at 10.35 p.m., and it turns out that the mails do not leave until 11.25, so that there is, or ought to be, ample time for the letters to be forwarded with them. It has been ascertained that there could be accomplished

even the additional trouble of sending a special car to fetch the bag from the station, as a man meets this particular train at Sheffield with a Rotherham, which is forwarded by a train at 10.40. If the arrangements at present contemplated are carried out the town will only be benefited to the extent of an hour, while it is clear if the facts may be relied on, that there is really no way the post should close before 9.30 p.m. It is stated that it would have been as well if the contemplated with the arrangement of the altered mode of running of a large of the memorialists

Another matter which has cropped up in connection with the postal regulations of the town is the fact that the extent of the afternoon delivery is under considerable uncertainty.

During the year two licensed victuallers had been proceeded against and convicted—one for permitting drunkenness, and the other for allowing his licensed premises to be used as a brothel. The latter had since given up
